

Design Build

After many years specialising in the manufacture of blasting machines Vixen have an extensive library of specially modified and purpose built machines. Today's manufacturing processes demand faster times and consistency. Vixen have adapted many machines using rotation of parts, automatic manipulation of blast guns and PLC controls for monitoring the processes or operating pick and placing of components in and out of the blast machine. Whether your application requires small alterations to a standard machine or a full turnkey CAD drawing proposal, Vixen have a solution to your problem at a price you can afford.
